

Ideation Phase

Define the Problem Statements

Date	01 October 2026
Team ID	SWTID-2026-4057
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow Incident user / service desk agent	Create and update Incident records with complete and accurate information	The Incident form does not automatically enforce all required field conditions based on the Incident's impact	Users may leave important fields incomplete or enter inconsistent information, especially when handling high-impact Incidents	Concerned about incorrect Incident data, incomplete records, and inconsistent incident handling
PS-2	A ServiceNow Incident administrator / service desk agent	Maintain consistent Incident records while reducing incorrect user actions	Users can manually enter inappropriate values, attempt to save incomplete records, or modify restricted fields directly from list views	The standard form interaction does not automatically provide all the required validation, automation, and interaction restrictions for the defined Incident workflow	Frustrated by preventable data errors and concerned about the quality and consistency of Incident records
